

Woodcock Family of Tests

Woodcock-Johnson III (WJ III) Tests of Achievement Form C

The WJ III NU Achievement Form C is a valid and reliable companion to the WJ III ACH Form B kit that is widely used by examiners in Canada.

Form C is a parallel form consisting of nine of the most-frequently-used tests from the set of 22 tests in WJ III ACH Form B. All of the items in Form C are new, offering examiners a valuable opportunity to reduce over-exposure to the items in WJ III ACH Form B. The new Form C can also be used independently of Form B.

Form C includes four new “brief” clusters that are useful for re-evaluation and progress monitoring (see table on next page). Two new intra-achievement variation procedures are also included in the new Compuscore V3.1 scoring software.

The Form C Test Records and Subject Response Booklets/Worksheets are available in two styles: one set includes all nine tests, and another “abbreviated” or “screening” set is for use when Tests 1, 2, and 3 are to be administered. The first three tests in Form C usually take about 15 minutes in total. All nine tests can be administered in about 35-45 minutes.

The Form C Test Records incorporate qualitative, brief, observation checklists for each of the tests, helping examiners to record and document important behaviour during testing – this can enhance the interpretation of test results. The Test Records for Form B have not been modified and continue to be used – please note that the estimated age and grade equivalents in all test records are estimates, and that the Compuscore software is used to obtain all reported scores.

WJ III ACH Form C is co-normed with WJ III ACH Form B (page 6) and WJ III COG (page 10).

See page 16 for pricing.
